Medium mixed with AF-Organic Compost **grip soil better.**

Medium mixed with AF-Organic Compost **more feeder root, better nutrient**

Promote Healthy Growth – Other Estate Plant

Dole Sebiro, Tanjung Malim. (*Cavendish*, 600Hectare)

Durian

Promote Healthy Growth – Landscape at Ex-Mining Land

For best planting result:

1. Mix existing sandy soil with AF-Organic Compost (25%), or
2. Put AF-Organic Compost around plant/glass.

Oil Palm - Replanting

A. 5 to 8kg each tree.

Tree survivor and growth: Conditioner and enough nutrient for the first 3 months.

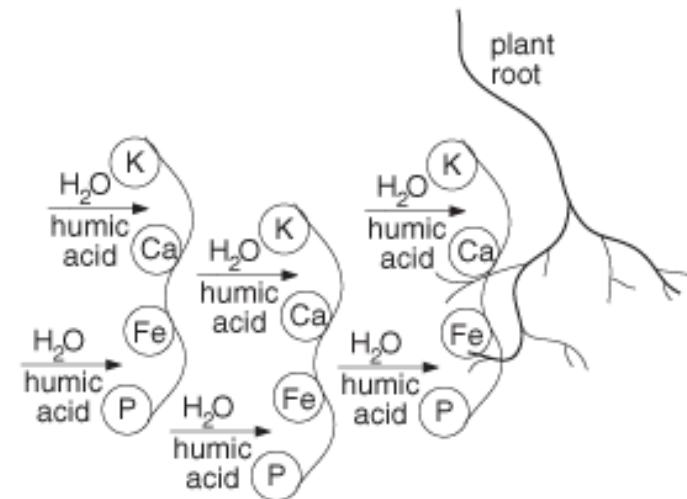

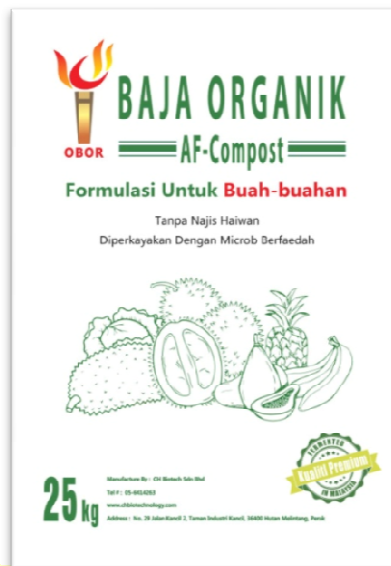

Oil Palm – Mature tree

B. 5kg each tree every 6months.

Humic Acid >10%, in CP-05

- Chelating effect with mineral fertilizer, improve nutrient availability.
