

# AF-Blue10

## AF-Blue10 Fortified Organic Fertilizer

1. **N:5 P:4 K:10 Mg:1.5**
2. **Contain Humic Acid & Organic Matter**
3. **Apply for Fruiting**

**AF-Blue10** Blue fortified fertilizer is a quality fortified fertilizer manufacture by CH Biotech S/B. The composition has been tested and certified by Malaysia local laboratory. AF-Blue10 is formulated for getting better fruit harvesting result as well as maintaining an active soil condition.

AF-Blue10 fortified fertilizer consists of substantial amount of organic fertilizer and mix with quality NPK fertilizer. The fertilizer ratio also provides sufficient nutrient for fruit harvesting. We are seeing consistent fruit harvesting result after applying AF-Blue10 fortified fertilizer in the farm.

## AF-Blue10 Composition:

- |                  |           |
|------------------|-----------|
| 1) Humic Acid    | 7%        |
| 2) Nitrogen      | 5%        |
| 3) Phosphate     | 4%        |
| 4) Potassium     | 10%       |
| 5) Magnesium     | 1.5%      |
| 6) Trace Element | Available |

## Apply Method and Precaution

AF-Blue10 is serving for better fruit harvesting, it suitable for almost every fruits planted in Malaysia. We recommend farmer could start with the below apply frequency. Farmer could also adjust the apply procedure in order to obtain optimize harvesting result.

Apply Frequency: Once every two weeks

Small tree species: 1-2kg/tree

**Large tree species: 3kg/tree**

Precaution:

In order to achieve better result, we recommend AF-Blue10 should apply around the tree trunk. The fortified fertilizer should apply near the root area for the convenient of nutrient absorption. Meanwhile, avoid placing AF-Bue10 in a local spot.

## Advantages of AF-Blue10

**AF-Blue10 fortified fertilizer** is derived from Organic Compost product. Our quality Organic Compost product consists of rich humic acid, organic matter as well as Trichoderma content. These are all the essential elements for soil rejuvenate.

Apart the organic matter, the adequate NPK content is formulated in providing sufficient nutrient for fruits harvesting. We strongly recommend farmer should select AF-Blue10 fortified fertilizer during the fruit harvesting period. The fertilizer covers most nutrient needs for fruit harvesting.

- Favourable environmental for microbe growing
  - Enhance disease resistance ability
  - Improve soil nutrient retention ability
  - Better chelating effect promote better nutrient absorption
  - Ensure provides sufficient nutrient for the tree
  - High potassium encourage better flowering and fruits harvesting
- AF-Blue10 consists the ability to rejuvenate a harden soil
  - Increase the beneficial soil microbe

## Precaution

Store in indoor with air ventilation.  
Stay away from children and pets.  
Not to eat.

## Packing

25kg/bag  
40kg/bag
